

# Wonderwood Drainage Project

## **Project Summary:**

Florida Department of Transportation (FDOT) is replacing drainage structures and pipes beneath the road along Wonderwood from I-295 to the Intracoastal Waterway. The existing steel pipes are being upgraded to more durable concrete pipes. The completed roadway will still include four lanes with bicycle lanes and sidewalks. Landscaping in medians removed during construction will be restored.

## **Lane Closure Schedule:**

Lane closures are scheduled during the day and at night for removing asphalt and paving, but no lane closures are allowed from 6-8 a.m. and 3-7 p.m. weekdays. Lane closures are not restricted on weekends. **Note:** Speeding fines are doubled when workers are present.

## **Other Traffic Impacts:**

A half-mile long traffic shift from Longleaf Pine Way to Gately Road is planned to facilitate construction. Traffic will be shifted onto temporary pavement placed in the existing median area. Construction will also include rebuilding roadway approaches to the Ginhouse Creek bridge.

## **Project Facts:**

Length: 6.7 miles  
Start Time: March 2015  
End Time: Spring 2016  
Contractor: J.B. Coxwell Contracting  
Company of Jacksonville  
Cost: \$8.7 million

**Special Note:** This is the first of two projects currently funded in FDOT's Five Year Work Program to upgrade pipes beneath Wonderwood from I-295 traveling east. The second project is anticipated to begin in 2017. The second project also falls within the same limits.
